

Birmjune Kim

Computer Science & Engineering Undergraduate · Seoul National University

Seoul, South Korea | johnbie0627@gmail.com | github.com/Birmjune | birmjune.github.io

Education

2024 - present **B.S. in Computer Science and Engineering**

Seoul National University, South Korea

- Ranked 1st among all students in the Computer Architecture course.

2021 - 2023 **Seoul Science High School**

Seoul, South Korea

- GPA 4.29 / 4.3 (1st in the graduating class for college admission).

Experience

2025 - present **Research Intern**

Machine Learning Lab (Prof. Hyun Oh Song), Seoul National University

- Researching and implementing a dynamic programming based dynamic decoding process for time series foundation models.

Honors and Awards

2025

- Entrepreneur Award (1st place for the idea), 3rd SKYST Joint Hackathon
- Finalist (top 100), 2025 NYPC Code Battle
- Finalist, Samsung Collegiate Programming Challenge (AI track)

2024

- National Science and Engineering Scholarship
- 8th overall (Team division), Simon Marais Mathematics Competition

2023

- Best Award, Graduation Thesis in Mathematics (Seoul Science High School)

2022

- Gold Medal, Korean Mathematical Olympiad (KMO), high school division
- Best Award, R&E Research Competition in Mathematics (Seoul Science High School)
- Excellence Award, Research Project Competition in Mathematics (Seoul Science High School)

2021

- Excellence Award, Research Project Competition in Physics (Seoul Science High School)

Research Interests

- Artificial Intelligence** — Foundation models and time series modeling.
- Hardware Systems** — Systems and hardware for fast computing.

Skills

Python · PyTorch · C / C++ · Shell

Languages

Korean (native) · English
