

Birmjune Kim

Computer Science & Engineering Undergraduate · Seoul National University

Seoul, South Korea | johnbie0627@gmail.com | github.com/Birmjune | birmjune.github.io

Education

2024 - present **B.S. in Computer Science and Engineering**
Seoul National University, South Korea

2021 - 2023 **Seoul Science High School**
Seoul, South Korea

Experience

2025 - present **Research Intern**
Machine Learning Lab (Prof. Hyun Oh Song), Seoul National University

- Research on time series foundation models.

Honors and Awards

2025

- Entrepreneur Award (Best Idea), 3rd SKYST Joint Hackathon
- Top 100, 2025 NYPC Code Battle
- Finalist, Samsung Collegiate Programming Challenge (AI track)

2024

- National Science & Technology Scholarship (Full Scholarship)
- 8th overall (Team division), Simon Marais Mathematics Competition

2023

- Best Award, Graduation Thesis in Mathematics (Seoul Science High School)

2022

- Gold Medal, Korean Mathematical Olympiad (KMO), high school division
- Best Award, R&E Research Competition in Mathematics (Seoul Science High School)
- Excellence Award, Research Project Competition in Mathematics (Seoul Science High School)

2021

- Excellence Award, Research Project Competition in Physics (Seoul Science High School)

Research Interests

- **AI Optimization** — Optimizing AI at various stages (training, inference and serving, model compression and quantization, AI compilers, systems software, and hardware acceleration). Currently applied to foundation models and time series modeling.
- **AI in the Physical World** — Putting the resulting models to work in the physical world (like robotics), where latency, memory, and power are real constraints.
