

Birmjune Kim

Computer Science & Engineering Undergraduate · Seoul National University

Seoul, South Korea | johnbie0627@gmail.com | github.com/Birmjune | birmjune.github.io

Education

- Mar 2024 - present
- B.S. in Computer Science and Engineering, Kim Jaechul AI Class (from Sep 2026)**
Seoul National University, South Korea
 - Cumulative GPA: 4.24 / 4.3 · Major GPA: 4.27 / 4.3
- Mar 2021 - Feb 2022
- Seoul Science High School**
Seoul, South Korea

Research Interests

- AI Optimization** — Optimizing AI across training, inference and serving, compression and quantization, AI compilers, and hardware acceleration; currently applied to foundation models and time series modeling.
- AI in the Physical World** — Putting those optimized models to work in the physical world (like robotics), where latency, memory, and power are real constraints.

Experience

- Dec 2025 - present
- Research Intern**
Machine Learning Lab (Prof. Hyun Oh Song), Seoul National University
 - Researching a dynamic programming based dynamic decoding process for time series foundation models.

Projects

SNU AI Challenge 2026, Image2Answer, Easy ARC-AGI Solver, and more on the [projects page](#).

Honors and Awards

- | | |
|------|--|
| 2026 | <ul style="list-style-type: none">Finalist, 10th of 206 teams, SNU AI Challenge 2026 |
| 2025 | <ul style="list-style-type: none">Entrepreneur Award (1st in business idea), 3rd SKYST Joint HackathonFinalist, Samsung Collegiate Programming Challenge (AI track) |
| 2024 | <ul style="list-style-type: none">National Science & Technology Scholarship (Full Scholarship)8th overall (Team division), Simon Marais Mathematics Competition |
| 2023 | <ul style="list-style-type: none">Best Award, Graduation Thesis in Mathematics (Seoul Science High School) |
| 2022 | <ul style="list-style-type: none">Gold Medal, Korean Mathematical Olympiad (KMO), high school divisionBest Award, R&E Research Competition in Mathematics (Seoul Science High School)Excellence Award, Research Project Competition in Mathematics (Seoul Science High School) |
| 2021 | <ul style="list-style-type: none">Excellence Award, Research Project Competition in Physics (Seoul Science High School) |

Skills

Programming: Python, PyTorch, C / C++, Shell

Languages: Korean (native), English
