

Birmjune Kim

Computer Science & Engineering Undergraduate · Seoul National University

Seoul, South Korea | johnbie0627@gmail.com | github.com/Birmjune | birmjune.github.io

Education

- 2024 - present **B.S. in Computer Science and Engineering**
Seoul National University, South Korea
- Cumulative GPA: 4.24 / 4.3 · Major GPA: 4.26 / 4.3
- 2021 - 2023 **Seoul Science High School**
Seoul, South Korea

Experience

- 2025 - present **Research Intern**
Machine Learning Lab (Prof. Hyun Oh Song), Seoul National University
- Research on time series foundation models.

Honors and Awards

- 2026
- Finalist, 10th of 206 teams, SNU AI Challenge 2026
- 2025
- Entrepreneur Award (1st in business idea), 3rd SKYST Joint Hackathon
 - Finalist, Samsung Collegiate Programming Challenge (AI track)
- 2024
- National Science & Technology Scholarship (Full Scholarship)
 - 8th overall (Team division), Simon Marais Mathematics Competition
- ~2023
- Best Award, Graduation Thesis in Mathematics (Seoul Science High School)
 - Gold Medal, Korean Mathematical Olympiad (KMO), high school division
 - Best Award, R&E Research Competition in Mathematics (Seoul Science High School)
 - Excellence Award, Research Project Competition in Mathematics (Seoul Science High School)
 - Excellence Award, Research Project Competition in Physics (Seoul Science High School)

Research Interests

- AI Optimization** — Optimizing AI at various stages (training, inference and serving, model compression and quantization, AI compilers, systems software, and hardware acceleration). Currently applied to foundation models and time series modeling.
- AI in the Physical World** — Putting those optimized models to work in the physical world (like robotics), where latency, memory, and power are real constraints.
