

Birmjune Kim

Computer Science & Engineering Undergraduate · Seoul National University

Seoul, South Korea | johnbie0627@gmail.com | github.com/Birmjune | birmjune.github.io

Education

2024 - present **B.S. in Computer Science and Engineering**
Seoul National University, South Korea

2021 - 2023 **Seoul Science High School**
Seoul, South Korea

Experience

2025 - present **Research Intern**
Machine Learning Lab (Prof. Hyun Oh Song), Seoul National University

- Research on time series foundation models.

Honors and Awards

- | | |
|------|--|
| 2025 | <ul style="list-style-type: none">Entrepreneur Award (Best Idea), 3rd SKYST Joint HackathonTop 100, 2025 NYPC Code BattleFinalist, Samsung Collegiate Programming Challenge (AI track) |
| 2024 | <ul style="list-style-type: none">National Science & Technology Scholarship (Full Scholarship)8th overall (Team division), Simon Marais Mathematics Competition |
| 2023 | <ul style="list-style-type: none">Best Award, Graduation Thesis in Mathematics (Seoul Science High School) |
| 2022 | <ul style="list-style-type: none">Gold Medal, Korean Mathematical Olympiad (KMO), high school divisionBest Award, R&E Research Competition in Mathematics (Seoul Science High School)Excellence Award, Research Project Competition in Mathematics (Seoul Science High School) |
| 2021 | <ul style="list-style-type: none">Excellence Award, Research Project Competition in Physics (Seoul Science High School) |

Research Interests

- Efficient AI Systems** — Cross-stack optimization for AI, including model compression, quantization, compilers, operating systems, and hardware acceleration.
- Foundation Models** — Foundation models and time series modeling.
