

Birmjune Kim

Computer Science & Engineering Undergraduate · Seoul National University

Seoul, South Korea | johnbie0627@gmail.com | github.com/Birmjune | birmjune.github.io

Education

- 2024 - present

B.S. in Computer Science and Engineering
Seoul National University, South Korea
 - Ranked 1st among all students in the Computer Architecture course.
- 2021 - 2023

Seoul Science High School
Seoul, South Korea
 - GPA 4.29 / 4.3 (1st in the graduating class for college admission).

Experience

- 2025 - present

Research Intern
Machine Learning Lab (Prof. Hyun Oh Song), Seoul National University
 - Research on time series foundation models.

Honors and Awards

- 2025

- Entrepreneur Award (Best Idea), 3rd SKYST Joint Hackathon
 - Top 100, 2025 NYPC Code Battle
 - Finalist, Samsung Collegiate Programming Challenge (AI track)
- 2024

- National Science & Technology Scholarship
 - 8th overall (Team division), Simon Marais Mathematics Competition
- 2023

- Best Award, Graduation Thesis in Mathematics (Seoul Science High School)
- 2022

- Gold Medal, Korean Mathematical Olympiad (KMO), high school division
 - Best Award, R&E Research Competition in Mathematics (Seoul Science High School)
 - Excellence Award, Research Project Competition in Mathematics (Seoul Science High School)
- 2021

- Excellence Award, Research Project Competition in Physics (Seoul Science High School)

Research Interests

- Efficient AI Systems** — Cross-stack optimization for AI, including model compression, quantization, compilers, operating systems, and hardware acceleration.
- Foundation Models** — Foundation models and time series modeling.
